ABOUT US

Since 2007, Alchemy 24 has been delivering breathtaking visual effects services for the film and television industry.

Masters in the art of creating stunning visual effects, whether they are fantastic, spectacular or yet, invisible, we stand out through our boundless creativity, the outstanding quality of our work, a keen sense of organization, and an unwavering commitment to reflecting the director's imagination down to the last pixel. We ensure unparalleled quality in every sliver of light.

Alchemy 24 means 24 frames per second, 24 hours a day, and quality that's pure 24-karat gold!

OUR VFX SUPERVISORS

Our close-knit team works proactively and with creativity.
We are far from the assembly-line work of larger studios; we are pixel artisans!

VFX TAX CREDITS

We know that price and budget are key considerations for our clients, and we provide guidance and support with the necessary documentation to benefit from tax incentives.

Our studio is officially certified, allowing our clients to benefit from tax credits on their productions. This recognition ensures compliance with the technical and artistic criteria required by current incentive programs.

Working with our team means optimizing your projects while significantly reducing production costs.

GENERATIVE AI/MACHINE LEARNING

Our studio evolves every day by seamlessly integrating new machine learning technologies in an invisible, unobtrusive way.

Our studio is entering a new phase by integrating artificial intelligence into the creation of its visual effects. This approach allows us to explore new creative possibilities, enrich our visual language, and push certain technical boundaries. It also helps us optimize our production processes, improve precision and efficiency, while maintaining a strong artistic direction, high quality standards, and essential human expertise at the heart of every project.

Artificial intelligence thus becomes a tool in service of creation, strengthening our vision without ever replacing it.

ALCHEMY 24 DARK LAB

The ancient alchemists transmuted base metals into gold. Pixel Alchemists, we distill blood and sculpt flesh, transforming light into bloody nightmares.

At Alchemy 24's Dark Lab, we are pixel Alchemists of a different kind, forging nightmares out of light itself. We dissect pixels, carve frames, and conjure visions that unsettle, disturb, and linger long after the screen goes dark. Our division is devoted to the art of horror: from subtle dread to visceral gore, from haunted atmospheres to relentless carnage.

Whether it's a creeping shadow or a full-scale nightmare made flesh, Alchemy 24's Dark Lab transforms imagination into terror.
